COLONIAL COTTON GROWING. The "Wall Street Journal" of New York

The "Wall Street Journal" of New York runarks; "I market by the European remarks as the International Cotton Congress of Vienna, emphasizing their purpose to extend the area of cotton cultivation in all parts of the world where the five could be grown, is one which must make for the advantage of the cotton interacts abroad as well as at home. The ground taken was, that for climatic reasons the European cotton milling industry could not afford to atlate its prosperity apon the outcome of the crop in any one sometimes of the could be a supposed to the contract of the country of of the c

vation in other parts of the world.

Another advantage often overlooked is that
which comes to American spinners and growers from outside competition. The idea that
the United States has a monopoly of cotton
growing has done more harm than good to the
methods of cultivation. Such a sense of advantages insulable sunariafuses. indifference in methods of cultivation. Such a sense of at-vantages inscribed superiorities in infference, resulting in lack of progress. The resoluteness of the Buropass, representatives, in pushing sotton cultivation in Africa, in Asis and in colonial passessions generally, is to be com-mended rather than discouraged. Several American mills are already depending almost wholly upon Egyptian cotton for lack of the long staple upland which has almost cessed to be grown. The time may come when foreign grown cotton will figure much more largely in the raw material demands of our mills than it does now. There will then be to mail strategie according from the foreignt of European consumer.

finish of one of the grainest works of armbiological exploration over undertaken by an Bag-ilah sciety. More than fortreen years ago the fined commenced in work of abstirg the great temple on the face of the cliffs at Deir al Balari, near Thebos. This immense edifice, built by the great Queen Hatshepsus, was one of the wonders of Egrpt, differing in style from all other temples, and especially from the temples of Thebes. The wave textiled not merely the exploration of the temple, but also, as far as possible, a restoration of the edifice by restoring the fallen or broken pieces to their positions, and the removal of Coptic and other buildings which had been built within the temple. "No doubt there is much truth in this—and the great political movements of recent years did not have their origin here. At the same time innume-allow movements have begun here, as Mr. Brooks may be willing to admit. tions exact on the social health, the intellectual alertness, and the political virility of the people! . . Washington is a capital by pre-natal malica oferthought; it was to be the capital that it was called into existence. And within the last year or two hintory has repeated itself in the Antipodes with curious carefulness. The same fears and jealousies that moved Americana over a century ago to fix the seat. of the Federal Government on a stretch of marshy woodland, far away from the real life of the nation, have all been stirring the Aus-tralian democracy; and the rivalries of the States, and especially of the big cities like Melbourne and Sydney, have finally cast like Australian capital of the future into the outer solitudes. "Having so delivered himself, Mr. Brooks
